HOW TO READ THIS PARTS LIST.

The range of parts in this List covers all serviceable components on Model/Models to the standard specifications. Where the part is confined to one specification, this is clearly defined in the Description or Remarks Column, and where the Part listed is not serviced, this is indicated by the letters N.S.P. in the Part Number column. Where the part is no longer available N.L.A. will appear in the Part Number column and where possible the superseded number will appear in the Remarks column. O.A.R., which will appear in the Remarks column means that this part is available only on Special Order.

This list is provided with a group index on the Title Page, and also more detailed indexes at the beginning of each separate section. Additionally, a Part Number index is also provided in the preface pages.

Items comprising an assembly (or sub-assembly) are inset for easy reference. This principle is followed in all Parts Lists, typical examples being given below.

EXAMPLES:

CRANKSHAFT ASSEMBLY	AMK2254
Plug	AMK97
PANEL ASSEMBLY - REAR LOWER	CZA418
Angle - Attachment - Rear Bumper	CZA417
Bracket - Rear Bumper Support	CZA164

The word Quantity as shown in the heading of all text pages is intended to convey that all figures appearing in that column are quantities used on a particular application and not quantities used per vehicle.

The assemblies and components in the plate illustrations are identified by numbers which correspond with the illustration/item references appearing on the facing text page in the column before the Part Number column.

It is essential first to identify the part against the illustration in the appropriate section of the List and then make use of the illustration reference number to locate the correct Part Number and official description on the adjacent page, taking into account Engine and Car Numbers, etc.

Although all items have illustration/item nos., some are not, in fact, illustrated. These are marked with *. All numbers are listed for easy amendment reference.

Where new assemblies or major modifications are introduced, notification may be effected in one of two ways, e.g. - Reprinted text page and its respective illustration page. The following example (A) is typical of the page identification used. Here it will be seen that a hyphenated number denotes Reprinted Pages.

EXAMPLE (A)

EXISTING PAGES	A1, A2, A3, etc.
REPRINTED PAGES (FIRST ISSUE)	A1-1, A2-1, A3-1
REPRINTED PAGES (2ND ISSUE)	A1-2, A2-2, A3-2

It may become necessary to extend information beyond the limits of the existing, or reprinted page, in which case an added text page and its respective illustration, if available, will be introduced into the sequence of page numbers. Example (B) shows how a letter is used to denote added pages.

EXAMPLE (B)

EXISTING PAGES	A1, A2, A3, etc.
ADDED PAGES	A1A, A2A, A3A
REPRINTS TO ADDED PAGES	A1A-1, A2A-1, A3A-1
PARTS LIST MAY THEN READ	A1, A1A, A2, A2A, A3, A3A
OR IN REPRINTED MANNER	A1, A1A-1, A2, A2A-1, A3, A3A-1

Where a new or amended Part Number occurs, this will be indicated by the symbol ■ in the approximate position of the Part Number.

An index to reprinted pages will be issued with each release, and will show progressively a list of all reprints. This should be retained in a suitable position in your catalogue.
